

COMPANY PROFILE

Nanovis Electronics Technologies

Your Excellent Partner for Intelligent, Sustainable Manufacturing

Since 2004 • China / Singapore / Vietnam / Japan • >40 professionals

Purpose – Vision – Strategy

Our foundation

1 Purpose

Act as a **value catalyst** to our solution partners and equipment suppliers, providing world-class local services for their cutting-edge technology that sustainably improves product quality and yield in advanced manufacturing.

2 Vision

Contribute to **efficient manufacturing processes** by bringing innovative technologies to the evolving semiconductor, EMS, medical and automotive value chains — enriching lives in the digital age and supporting ESG targets.

3 Strategy

Capitalise on strong electronics exports in **Asia Pacific**, backed by local direct sales and service offices — lowering cost of ownership through scalable solutions and traceable quality control at critical process transitions.

Powering Intelligent, Sustainable Manufacturing Across Asia

Who We Are

Company overview

Experienced Regional Service Provider

Specialised in yield-improvement solutions and instrumentation since **2004**. Extensive experience in marketing and field-service support for advanced equipment and process tools across the semiconductor and electronics manufacturing ecosystem.

Areas of Expertise

● Reliability & IC functional test

● IC failure-analysis instruments

● Equipment service & maintenance

● Advanced manufacturing sustainability solutions

● Automated vision inspection

● Test lab services

Growth target

Exceed the industry growth rate

Three Strategic Pillars

1

Market Proximity & Coverage

Local-for-local market access and strategic partnerships, ensuring close customer relationships and rapid response across Asia Pacific.

2

Adapted Technology & Product

Smart manufacturing automation, factory digital integration and technology roadmaps aligned with industry evolution and customer needs.

3

Service Excellence

Test lab services, technical training, engineering collaboration and ESG partnership to deliver comprehensive value to our customers.

Our Growth Journey

From distributor to comprehensive solutions provider

Founded in **2004** as a distributor of innovative, reliable solutions for the semiconductor industry — from front-end metrology to back-end test and assembly, and FA/reliability. NET has since expanded across ASEAN and diversified into advanced manufacturing solutions, including ESG green solutions for water treatment.

Semicon FE

Front-end wafer metrology and process-control solutions

Fab process / FA / reliability

Semicon BE

Back-end IC test, assembly and packaging solutions

Test & assembly

AI-Driven Manufacturing

Optimising production quality for smart manufacturing at lower cost

3D inspection

Innovative Test Lab

Test lab and engineering value-add for automotive and electronics parts and systems

Electronics / automotive

Green Solutions

Carbon-footprint reduction for sustainable manufacturing

Cooling tower water treatment/ Water Efficiency

Customised Test Lab Services

Value-added services

Comprehensive testing solutions

End-to-end test lab services that ensure product quality, compliance and reliability across the product lifecycle — from R&D to mass production.

01

Building Protocol

Customised testing protocols for each product based on:

- International standards
- Target-market regulations
- Industry-specific requirements
- Customer specifications

02

Pre-Production Testing

Comprehensive testing at R&D stage to:

- Identify potential design issues
- Address production challenges early
- Validate product specifications
- Optimise manufacturing processes

03

Production Testing

Ongoing quality assurance during mass production:

- Random sampling protocols
- Alignment with R&D samples
- Continuous monitoring
- Statistical process control

04

Quality Solution Consulting

Expert consultancy services:

- Quality system optimisation
- Process improvement strategies
- Compliance guidance
- Technical training programmes

Thank You

We look forward to partnering with you
